Storage of Controlled and Regulated Materials

The objective was to provide a secured In-bound and Out-bound staging area adjacent to a climate controlled storage room.

The Challenge:

- Support receiving verification and stocking, as well as, prepare out-bound order staging in a spacious yet secured area.
- Prevent unauthorized access without hindering productivity and the required in and out travel of authorized personnel.
- Maintain safety and egress requirements without compromising security.

The Solution:

- Provide a secured enclosure (including ceiling panels) designed and installed to fit the building with the consideration of utilities, piping and other obstructions.
- Provide limited accessibility by implementing an access tracking security card system.
- Provide a forklift accessible sliding gate with remote control push button activation and automatic closure allowing forklift operator to remain on the lift to gain access when arriving at the gate.
- Maintain safety and egress requirements without compromising security.
- Maintain safety and security with self-closing man doors and forklift gates.

**This solution met all safety and accessibility requirements for
Controlled and Regulated Materials**
